DAIRY & FOOD SANITATION
INDEX TO VOLUME 6

AUTHORS INDEX

A

AIROLDI, A.A., microbiological contamination of sweet water and glycol cooling systems used in the HTST Pasteurizer, 524.
ALLEN, J., (see Kennedy, 231).
ALVAREZ, R.J., book review, 40.
ANDERSON, J.W., overview of contaminants distribution in southern california coastal waters, 526.
ANDERSON, K., book review, 584.
AYAZ, M., (see Salji, 6).

B

BAILEY, J.S., improved selective plating medium for detection of salmonellae from fresh and cured poultry samples, 524; (see Cox, 628).
BALLENTINE, C., weighing the risks of the raw bar, 121.
BANDLER, D.K., (see Senyk, 516).
BARNARD, S.E., bacterial quality and flavor of milk in the northeastern U.S., 514; processing fluid milk, 515.
BATTEN, W.C., automatic grease/oils/fats removal units for food processing facility effluent treatment applications, 517.
BIANCO, J.L, good sanitation practices, 566.
BLACKWELL, J.H., viruses in products of food animals, 398.
BRACKETT, R.E., antimicrobial effect on chlorine on *L. Monocytogenes* in phosphate buffer and brussel sprouts, 520.
BULLERMAN, L.B., book review, 40,90; the occurrence and significance of molds and mold growth in foods, 523; effects of competitive molds on growth and aflatoxin production by *aspergillus flavus* and *aspergillus parasiticus*, 523; (see Lindell, 523).
BUSSE, M., letter to the editor, 33.

C

CHAMBERS, J.V., securing the "safety net" in the dairy industry, 340.
CHARM, S.E., a standard "antibiotic free" milk, 514; (see Wehr, 514).
CHEN, J.H., refrigerated packaged orange juice can be monitored for freshness using polymer indicator label, 280; packaged milk, cream and cottage cheese can be monitored for freshness using polymer indicator labels, 402.
CHIU, J.Y., (see Bailey, 524).
CLAYPOOL, L.L., (see Kennedy, 231).
COLLINS, H.F. monitoring for organic chemical contamination in public water systems in california, 526.
CORRISTAN, N.J., (see Wehr, 514).
COX, N.A., (see Bailey, 524); recognition and identification of foodborne bacteria, 628.

D

DAGGS, R., field evaluation of a modified farm inspection program, 515.
DARRAH, R.M., clean room concepts for the food industry, 517.
DEIBEL, R.H., rapid detection of *salmonella* in foods using the Gene Trak assay in conjunction with a modified enrichment procedure, 525.
DICKERSON, R.W., Jr., eliminating cross-connections between raw and pasteurized products in dairy plants, 515.
DIEP, O., (see Johnston, 515.)
DOCKERTY, T.R., (see Gravani, 517).
DOYLE, M.P., update on emerging pathogens in foods, 518.

E

ECKNER, K.F., the microbiology of slow-cooked, stuffed turkey, 519.
EDMISTON, B.B., (see Gravani, 517.)
EL-AHRAF, A., public health aspects of dairies in southern california, 116.
EMERY, H.C., book review, 90,247,482, 584; confined spaces: potential problem for sanitarians, 332.
EMMONS, D.B., (see Farber, 520).

F

FARBER, J.M., Heat resistance of *listeria* monocytogenes in artifically-inoculated and naturally-contaminated raw milk, 520.
FARLEY, D., fda's global reach to protect public health, 228; from tainted feed to mother's milk, 504.
FELIX, C.W., packaged ice: a growing food protection problem, 519.
FIRSTENBERG-EDEN, R., (see Tsang, 516).
FOSTER, R., (see Johnston, 515).
FOX, T.L., (see McAllister, 632).
FUNG, D.Y.C., (see Cox, 628).

G

GINN, R.E., presidential address, 113; (see Packard, 236).
GLASS, E.D. (see Barnard, 515).
GRAVANI, R.B., food science facts, 20, 77, 137, 192, 244, 585; the relationship of Sanitation knowledge to profits in meat departments of a retail supermarket chain, 517; (see Hotchkiss, 524).

H

HARTMAN, P.A., (see Cox, 628).
HARRINGTON, R.E., how to protect your restaurant against foodborne illness, 146; preventing bacterial growth, 256; characteristics of major foodborne diseases, 302; how to implement a safe program, 357; how to prevent viral infections and chemical poisonings, 415.
HEAPS, J.W., overlooked insect harborages, 4.
HERALD, P.J., attachment of *Listeria monocytogenes* and *Yersinia enterocolitica* to stainless steel at various temperatures and pH values, 521.
HOTCHKISS, J.H., assessing the microbiological safety of modified atmospheric packaging: spoilage vs pathogenicity, 524; current status of tamper evident features available for packaged foods, 524.
HUGGINS, A.R., food safety research and educational priorities for the dairy industry, 521.
HUHTANEN, C.N., improving the efficiency of the Bot-Elisa test, 519.

J

JOHNSON, R.W., microbial food safety, 174; (see Bailey, 524).
JOHNSTON, M.A., microbiological quality of canadian frozen dairy products, 515.

K

KELSEY, R.B., bottled water quality, 525.
KENNEDY, J.I., the future of the NCIMS, 231.
KERVAHN, W.G., water for southern california, 525.
KLOOS, C., importance of statistical quality control in food processing, 518.

KNUTSON, K.M., use of microwave ovens for in-home pasteurization of milk, 520; (see Marth, 460).
KOWALEWSKI, C., (see Deibel, 525).
KOZAK, J.J., (see Kennedy, 231).
KOZLOWSKI, S.M., (see Senyk, 516).

L

LAMB, M., (see Tsang, 516.)
LECOS, C.W., worrying about the right issues in food safety, 288; cutting cholesterol? look to the label, 569.
LEE, S.J., (see Bullerman, 523).
LINDELL, M.J., molds involved in the development of "Blue-eye" disease of stored popcorn, 523.
LINDENTHAL, R.K., survival of *L. monocytogenes* in simulated milk cooling systems, 521; (see Airoldi, 524).
LOZIER, P.J., (see Ward, 519).

M

MARSHALL, R.T., book review, 483.
MARTH, E.H., important milestones in the history of milk pasteurization, 460; (see Knutson, 520); (see Ryser, 522); (see Schaack, 522); (see Yousef, 522); editor of JFP says aufwiedersehen, 637.
MARZOUK, M.A., (see El-Ahraf, 116).
MATASON, R.A., (see Barnard, 515).
MATTHYS, A., letter to the editor, 416.
McALLISTER, J.S., bacteria in processed fluid milk samples, 632.
McKELLAR, R.C., (see Farber, 520).
McLAUGHLIN, E.W., (see Gravani, 517).
MOIR, L.M., (see Barnard 514).
MOOD, E.W., food safety in the skies, 464.
MOSSEL, D.A.A., human listeriosis transmitted by food in a general medical-microbiological perspective, 521.
MOZOLA, M.A., (see Deibel, 525).

N

NICHOLS, J.G., fda's Fy 87 aged hard cheese pathogen surveillance sampling program-progress report, 516.

O

O'DONNELL, J.A., the impact of dairy producers on product/process research and development, 515.
OLSON, J.C., better today than yesterday (keynote address from the 1986 annual meeting) 283.

P

PACKARD, V.S., evaluation of an energy-storage system for electrical water heaters used on milk houses on dairy farms, 61; use of lotus 1-2-3 in evaluation of various aspects of infra-red analysis of milk components, 168; an evaluation of reference test results of dairy farm herd milk supplies used in a component analysis control program, 236.
PALUMBO, S.A., can refrigeration keep our foods safe?, 56.
PARK, M., (see Wehr, 514).
PEDERSON, D., (see Wehr, 514).
PEPER, D., book review, 445.
PERALES, I., (see Mossel, 521).
PURVIS, U.T., (see JOHNSTON, 515).

R

RAMOS, M.S., (see McAllister, 632).
RODMAN, V., book review, 583.
RYSER, E.T., survival of *L.* monocytogenes in cold-pack cheese food during refrigerated storage, 522.

S

SALJI, J.P., the dairy processing industry in the central province of Saudi Arabia, 6.
SANDERS, G.W., (see Farber, 520).
SAWAYA, W.N., (see Salji, 6).
SCHAACK, M.M., behavior of *L. monocytogenes* in skim milk during fermentation by lactic starter cultures, 522.
SCHWARZ, T.L., give 'em air, 500.
SENYK, G.F., selection of bacteriological tests for monitoring the cleaning of milk pipelines, 516.
SIAKEL, R.J., (see Deibel, 525).
SINGH, R.P., application of time-temperature indicators in food inventory management, 518.
SKINNER, K.J., (see Young, 392).
SMITH, D.E., book review, 247, 445, 482, 483.
SMUCKER, J.M., sanitation and good manufacturing practices in dairy processing plants, 516.

T

THOMPSON, R.C., out of the bronze age, 396.
TODD, E.C.D., the cost of regulatory court action and legal suits to the food industry, 518.
TOWNSEND, L., president's message, 561.
TSANG, N., assessment of the microbial quality of dairy powder using the impedance technique, 516.
TWOMEY, T., radioactivity and its measurement in food stuffs, 452.

U

UNDEBRINK, T.K., the city of Pasadena's approach to volatile organic chemical (voc) contamination in ground water, 526.

V

VAN NETTEN, P., (see Mossel, 521).
VASAVADA, P.C., (see Cox, 628).

W

WAGNER, M.K., (see Marth, 460).
WARD, N.R., detection of specific microorganisms or toxins by biosensors, 519.
WEHR, H.M., the incidence of antibiotics other than penicillin in producer-raw and finished milk products, 514.
WELLS, J.H., (see Singh, 518).

Y

YOUNG, F.E., summer food safety tips, 392.
YOUSEF, A.E., survival of *L. monocytogenes* during the manufacture and ripening of colby cheese, 522.

Z

ZALL, R.R., (see Chen, 280, 402).
ZAMULA, E., beyond yogurt: milking the pubic's taste for exotic health foods, 336; when it comes to stylish sushi, it's safer to be square, 502.
ZOTTOLA, E.A., (see Eckner, 519); (see Herald, 521); (see Lindenthal, 521); (see Airoldi, 524).
ZDUNOWSKI, G., (see El-Ahraf, 116).

SUBJECT INDEX

Bacteria
recognition and identification of foodborne bacteria, 628

Biosensors
detection of specific microorganisms or toxins, 519

Cheese
surveillance sampling, 516

Cleaning and Sanitizing
public health aspects of dairies in s. calif., 116

Clostridium botulinum
improving the efficiency, 519

Dairy Industry
FDA's safety initiatives, 124
field evaluation-farm inspection program, 515
eliminating cross-connection in raw and pasteurized products, 515
national mastitis council column, 28, 82, 457, 586, 656
northwest dairy practices council, 321
polymer indicator labels monitor freshness, 402
processing in the central province of Saudi Arabia, 6
producers on product/process research and development, 515
"safety net" performance, 340

Environmental
automatic grease/oils removal units, 517

Food
facts for the sanitarian, 20, 77, 137, 146, 192, 244, 585
hazards for health, 26, 83, 142, 252, 300, 353, 413, 472, 531, 587, 649

Food Packaging
safety of modified packaging, 524
tamper evident features, 524

Food Protection
can refrigeration keep our foods safe, 56
cholesterol, look to the label, 569
clean room concepts, 517
conference for food protection executive summary, 292
FDA's global reach to protect public health, 228
microbial food safety, 174
packaged ice: a growing problem, 519
packaging mushrooms, 500
safety in the skies, 464
summer safety tips, 392
viruses in products of food animals, 398
worrying about the right issues, 288

Health
"getting a healthy tan", 396

Health Foods
beyond yogurt: exotic health foods, 336

Home Food Handling
microbiology of slow-cooked turkey, 519

letters to the editor, 33, 416, 645
membership application, 41, 66, 136, 225, 277, 329, 449, 540, 562, 658
new members, 29, 86, 150, 207, 248, 312, 361, 430, 477, 534, 609, 651
past award winners, 38
presidential address, 113
president's message, 561
secretary candidates, 70
74th annual meeting report, 590

Listeria and Listeriosis
attachment to stainless steel at various temp. and values, 521
cold-pack cheese, 522
dairy and food industries, 521
effect of chlorine in phosphate buffer and brussel sprouts, 520
heat resistance in milk, 520
manufacture and ripening of colby cheese, 522
milk cooling systems, 521
skim milk during fermentation, 522
transmitted by food, 521

Meat Products
sanitation in retail supermarket, 517

Milk Products
antibiotics other than penicillin, 517
electrical water heaters in milkhouses, 61
microwave in-home pasteurization, 520
pasteurization, important milestones, 459
pesticides journey through the food chain, 504

Milk Regulation
NCIMS, the future, 231
processing fluid milk, 515
sanitation and manufacturing practices, 516

Milk Testing
"antibiotic free", 514
bacteria in processed fluid milk samples, 632
bacterial quality and flavor, 514
cleaning of milk pipelines, 516
dairy powder using impedance technique, 516
herd milk supplies in a component analysis control program, 236
lotus 1-2-3 infra-red analysis, 168

Molds and Mycotoxins
"blue-eye" disease of stored popcorn, 523
growth and aflatoxin by *aspergillus flavus* and *parasiticus*, 523
growth in foods, 523

Occupational Safety
sanitarians working in confined spaces, 332

Orange Juice
packaged for freshness, 280

Pest Management
overlooked insect harborages, 4
preventive pest control, 644

Public Health
foodborne diseases, 302
preventing bacterial growth, 256
protect your restaurant against foodborne illness, 146
SAFE program, 357
viral infections and chemical poisonings, 415

Radioactivity
measurement in food stuffs, 452

Salmonella
contamination of sweet water and glycol cooling used in the HTST pasteurizer, 524
detection from fresh and cured poultry samples, 524
rapid detection foods, 525

Sanitation
good practices, 566

Seafood
at home consumption, 636
hazards of sushi, 502
risks of the raw bar, 121

Water Quality
bottled water, 525
contaminants in S. Calif., 526
organic chemical contamination in ground water, 526
water for s. calif., 525

3-A
standards, 550, 556, 678
symbol holders list, 98, 420

ATKINS THERMOMETERS... TOUGHEST FOR FOOD AND FOOD EQUIPMENT

Splash Proof, Best Accuracy in the Industry, Single Probe with both thermocouple probe and instrument errors factory-calibrated out to 0.1% rdng. + .7C, Reading "Hold", Backlighted LCD.
 # 330XX—JF (or C) ..... **$98.00** including probe.
Specify needle or surface probe tip, & F or C

Big-Digit, Belt-Clip-Mountable Thermometer (35,000 already sold), accuracy 1% reading + 1 + probe; use with single probe or in kit with many probes. F/C Switch; reads in 0.1 up to 199, then 1.
 # 39658-K thermometer & needle thermocouple
 # 50335-K **$138.00**
Thermometer Kit with probes for grill, freezer, oven, needle for drinks/cooking oil/salad-food bar
 # 939XX-K **$304.00**

Shirt-Pocket Thermometer in Stainless Steel and accuracy 0.4% reading + 1 + probe; use with single probe or in kit with many probes. F/C Switch.
 # 386XX-K thermometer & needle thermocouple
 # 50335-K **$168.00**
Type T thermometer model available in 0.1

Thermometer Kit with probes for grill, freezer, oven, needle for drinks/cooking oil/salad-food bar
 # 938XX-T **$328.00**

NSI Introduces
the DIGITRON 3000 series of portable digital thermometers.
For precision temperature measurement in a wide variety of applications, this unique range of thermometers provide a reliable and cost effective solution.

Features include:
- 0.1 degree resolution.
- Degrees C or F readout.
- Differential temperature measurement.
- Display hold function.
- Temperature measuring range of −58 to +1999 degrees F.
- Rugged construction.
- Comprehensive range of probes.

For more details, call or write;
NSI
3 Penns Trail, Newtown, PA 18940 (215) 968-7577
